

K2002P Snake Handling

State ID: K2002P

About this course

Need to know how to capture and release reptiles, including venomous snakes?

This course provides participants with the skills and knowledge to safely remove and relocate snakes in the home and workplace.

Topics covered throughout this course:

- Snake and reptile behaviour
- Utilising protective clothing and equipment
- Catching and releasing venomous species in a supervised setting
- Keeping yourself and others safe in the presence of dangerous snakes
- Administering first aid for bites and stings

To attend this course, you must be wearing Personal Protective Equipment (PPE), including long trousers and covered footwear.
